Max
Greenfields Primary School

"I was really surprised by how many more friends I made when I got to high school. They are all from other schools. We sit under the big tree near the basketball courts."

DESIGN & TECHNOLOGY
Metalwork

Joanna Meadow Springs Primary

I've only been living in Australia for eighteen months and I really didn't know what to expect from high school. I was nervous and thought making friends would be really difficult. Adding to that, only a few of my friends came with me from primary school, so I didn't know many students on day 1 at all!

I've made A LOT of friends! I don't even know what I was worried about. I wasn't expecting to make so many friends from other year groups as well.

If I had to pick a favourite subject at school, it would have to be mathematics. I have improved a lot this year. Mrs West is my teacher and she really challenges us and I'm enjoying it.

Ruby, Madi & Keira Riverside, Meadow Springs & Dudley Park Primary

We love that we get to change classes and teachers throughout the day. Each teacher is a specialist in that subject, so we seem to learn a lot more and quicker.

We are all in Surf Science and *in unison* WE LOVE IT!

We are so excited for Year 10, we get an option to do a Japan trip with the school as part of our Japanese class. We can't wait for that camp!

PERFORMING ARTS

DRAMA

Ruby

Riverside Primary

Are you feeling a bit unsure about starting high school? I totally get it — I didn't come to the Transition Expo or Transition Day, so everything felt really new when I started. I hadn't even seen a timetable before, but once I got here, it all made sense and was actually pretty easy to follow.

One of the things I love most about high school is science. We get to do real experiments, which makes it so much fun! I also really enjoy maths — the questions are more challenging than in primary school, but I like that. It makes me feel like I'm learning something new every day.

Another surprise for me has been how much I like drama. We're learning how to project our voices and perform, and I'm already looking forward to taking part in Yoh-Fest later this year!

Something that's also really exciting is that my little sister will be coming to JTC next year. I think it's going to be great to go through high school together.

So if you're feeling nervous — don't worry! There are lots of fun things to try, and you'll figure things out quickly. High school is a big change, but it's also full of new experiences to enjoy. You've got this!

Ziggy Singleton Primary

I was worried about going to high school but everyone is super nice. We sit at the Year 7 area of the basketball courts and I've made lots of new friends. Lenny and Kasper are my best friends, I only met them this year.

My favourite class is phys-ed and am excited for our camps and snorkelling but I also really like that we are contributing to community groups, like Estuary Guardians and Reel-It-In.

"This place is pretty good! We have a lot of outdoor classes and on our first camp we got to drive a dinghy!"

"I like being around kids with the same interests in the environment too."

JTC Dawesville Marine Centre

Cleo Meadow Springs Primary

My favourite class is Performing Arts with Miss Draper. It took me a couple of weeks to become comfortable in high school, but since I had a background of dance and performing arts, this class felt like the perfect space to start my journey.

I love science. We've been learning about filtration, and we get to do experiments which is great. I'm especially looking forward to Year 9 science because I've heard we get to do some really exciting experiments that explode!

Cleo is discovering new interests and is looking forward to her new classes.

Ivie Singleton Primary

I've already discovered so much about my passion for science! Recently, we've been learning about microplastics—how they break down and the time it takes for them to decompose. It's fascinating and makes me realise how important it is to protect our environment!

Outdoor learning is a big part of my life here, especially with marine biology. I love being outside and exploring the local ecosystem. I'm also excited to work with the careers team in the future for the 'Try a Trade' program, which is helping me think about my future career journey.

I can't wait to see what else this year has in store!

SCIENCE

PRACTICAL LESSON &
AQUACULTURE CENTRE

Imogen Greenfields Primary

Did you know?

John Tonkin College, in partnership with Murdoch University Harry Butler Institute and the Alcoa Foundation, is leading an innovative project studying mussel species equipped with sensors across our region.

Dive into the fascinating world of marine ecology with Imogen's exclusive mussel dissection tutorial!

Join us in exploring the hidden depths of our marine ecosystem today.

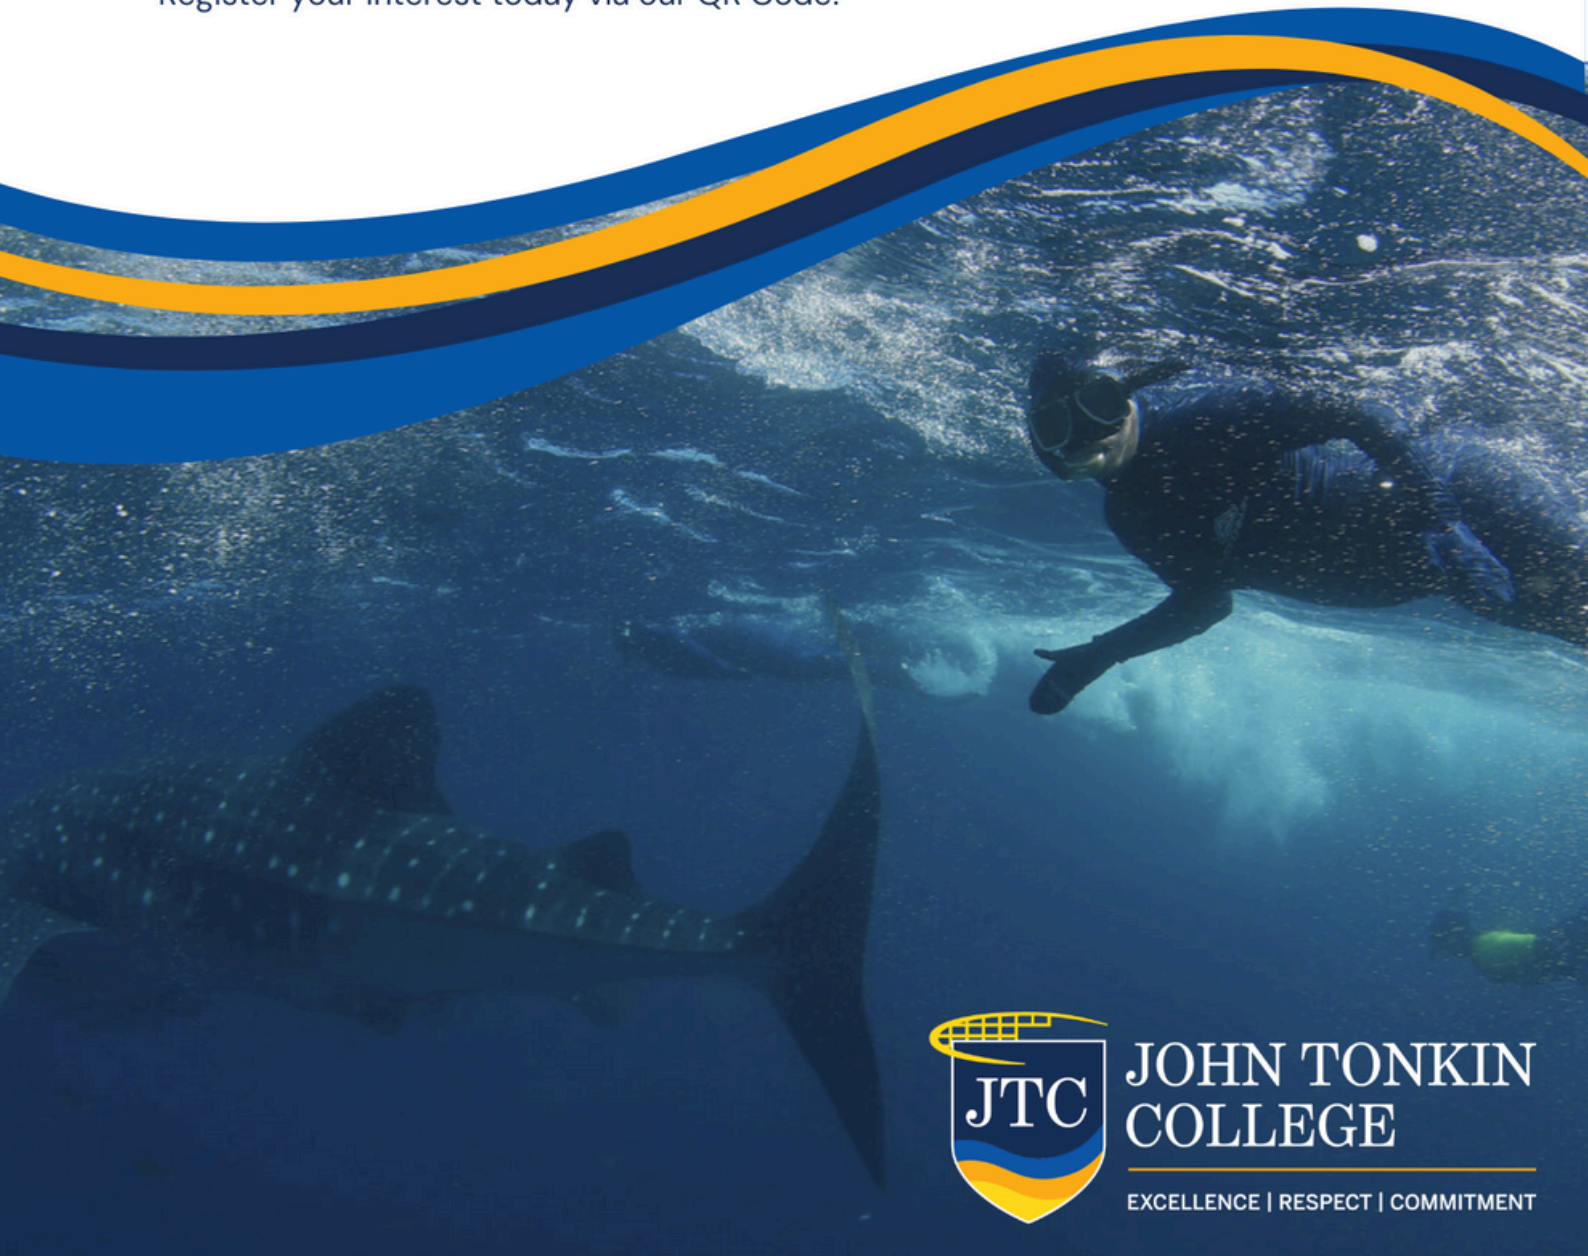

SURF SCIENCE SPECIALIST PROGRAM

20
26

A science and outdoor education specialist program, endorsed by Education Department of Western Australia, for students from year 7 to 9 with a keen interest in studying the marine environment.
