Emily Oakwood Primary

Are you feeling a bit worried about starting high school — especially if your friends are going somewhere else? I felt the same coming from Oakwood Primary. I thought I wouldn't see my friends much anymore, but that hasn't been the case. We still catch up all the time, and those friendships are still going strong.

One thing I've realised is that making new friends is actually pretty easy. If you're kind to people, they're kind back. I remember standing outside my first Maths class on Day 1 — a small chat turned into new friendships straight away.

My favourite class is definitely Cooking — I love it! I'm also enjoying Surf Science. I'm still building my confidence, but working in groups makes it fun, and it feels like a really supportive class.

The teachers are great too. It feels like a more mature environment, and they're really easy to get along with.

Coming to the Transition Expo and Transition Day helped me feel more comfortable before starting. I got to look around the school and see some familiar faces, which made those first few days much easier.

So if you're feeling unsure, don't worry. You'll settle in, make new friends and find your way before you know it.

DESIGN & TECHNOLOGY

Metalwork

Brayden Meadow Springs Primary School

"The best thing about high school is being able to work on our own in classes like in Metal Work and science, where we are shown what to do and then we get straight into the practical lesson."

Brayden explains how he worried that the work might be too hard and he may struggle, but he has kept on top of the school work, no problems.

"I also like moving around the school for classes during the day. Your brain doesn't get tired from sitting in the same classroom all day."

A photograph of two young boys, Noah and Jackson, standing on a rocky shore. They are both wearing dark blue short-sleeved shirts with yellow sleeves and yellow 'JTC' lettering. They are also wearing dark blue shorts with yellow trim and a small 'JTC' logo on the left leg. The boy on the left is holding a fishing rod. They are both smiling at the camera. The background is a large body of blue water under a clear sky.

High school has been really fun so far — there's always something to look forward to each day.

One of the best things is how each class feels like a fresh start. If one lesson doesn't go your way, you can reset as soon as you walk into the next one. New class, new teacher, new momentum — it makes a big difference.

I really enjoy Maths, but Surf Science is definitely my favourite. The Surf Science Camp has been a highlight, and it's something I'll always remember. I actually get disappointed if I have to miss school — especially when it means missing Surf Science!

"Every class is a fresh start — and Surf Science is the one I never want to miss."

Kye Dudley Park Primary

I wasn't too sure what high school would be like at first — it felt like a big step up from primary school. But it didn't take long to realise there was nothing to worry about.

The teachers are really supportive and easy to get along with, which made settling in a lot easier than I expected. One of my favourite things is being able to move around the school for different classes — it makes every day feel a bit more independent and exciting.

I also made new mates really quickly. Everyone was welcoming, and my friends helped me find my classes in those first few weeks, which made a huge difference.

I'm really looking forward to starting Cooking next term — I can't wait to try something new and learn new skills.

High school has been a great start so far.

Reggie Dudley Park Primary

I've really enjoyed settling into high school — it's been a great experience so far.

I was a bit unsure at the start, but there was honestly nothing to worry about. Coming to the Transition Day and Transition Expo made a big difference. I already knew my way around, which helped me feel confident from day one.

Science has definitely been my favourite subject. It's really interactive, and getting to use the Bunsen burners has been a highlight — it makes learning a lot more exciting.

High school has been a great start, and I'm keen for what's ahead.

FRIENDSHIP GROUPS

HAMISH

JTC's THERAPY DOG

Aaliya & Sienna Oakwood Primary

Starting high school is a big moment — but for Aaliyah and Sienna, it was one they were secretly hoping to share.

Best friends since Kindy, the two had both set their sights on Surf Science after hearing about it for the first time during a presentation from Mr Heeley at their primary school. Without even telling each other, they both applied... and both got in!

It wasn't until later they realised they'd be heading to JTC together — and the excitement was instant. Now in Year 7, they're loving being part of Surf Science and starting this new chapter side by side.

What began as a shared interest has turned into a shared journey, with both girls already looking ahead to their future goals — Aaliyah dreaming of becoming a Marine Biologist, and Sienna hoping to become a teacher.

From Kindy to high school, their friendship continues to grow — proving that sometimes the best adventures are the ones you end up on together.

"We were so excited to both be coming to JTC together!"

Indigo Singleton Primary

One of the best things about starting high school has been how close everyone feels in Year 7. That's probably what I've enjoyed most.

I was really worried about bullying before coming to high school. I've experienced it before, so I was hoping for a fresh start in 2026 — and that's exactly what I've found. My friends are kind, supportive and honestly feel like a family.

I've also been loving Cooking. We've made chocolate truffles, pizza and milkshakes — the milkshakes were definitely my favourite! I'm not sure what elective I'll have next term, but I'm excited to try something new.

Another thing I really like is being able to express myself more. From hairstyles to jewellery, it feels like you can be yourself — and that makes school a really comfortable place to be.
